MECHANIC ENGINEERED at a BUDGET PRICE

Century

THE LINE WITH THE BUILT-IN EXPERIENCE

Over 30 years of experience and progress have gone into the development of this new and economical line of tool cabinets. Mechanics participation in design has led to the unusual "functionability" of all Century products, such as more usable space for storage, easy selection of tools and efficient working conditions. Heavier construction, bonderized and baked on red enamel finish and quality workmanship backed up by the finest in engineering and design have been blended to offer the automotive trade a truly outstanding value.

For dependable performance, better weather protection and top functional heavy-duty construction, look to the Century's biggest buy . . . "The Century".
